The Connect America Fund offers a great opportunity for you to help your customers reach the next level of technology. If you haven’t considered using a contracting company in the past, this is the time to give Alamon a try. We can engineer, install and test your CAF-related equipment. You won’t need to hire and train staff specifically for a CAF project, only to let them go once the work is done. And if you have used Alamon in the past, you know we are the right company for all your CAF needs.

Since its founding in 1975, Alamon has developed long-term relationships with many of the country’s most recognizable corporations — Verizon, CenturyLink, Frontier Communications and more. Our 12 regional offices located throughout the United States enable us to work with high-profile and small companies alike, in any location.

Our reputation for quality workmanship and on-time delivery is documented by our customer ratings, as we consistently earn top scores in all areas of service. We are known for keeping defects to a minimum and pride ourselves on doing things right the first time. Our quality offers the best value for your money.

Alamon covers almost every segment of the telecom market. If you have a need, we can fill it.
Broadband has gone from being a luxury to a necessity for full participation in our economy and society – for all Americans. For that reason, the FCC has adopted comprehensive reforms of its Universal Service Fund (USF) and Intercarrier Compensation (ICC) systems to accelerate broadband build-out to the approximately 23 million Americans (as of December 31, 2013) who lack access to infrastructure capable of providing 10/1 Mbps fixed broadband. This reform will expand the benefits of high-speed Internet to millions of consumers in every part of the country by transforming the existing USF into a new Connect America Fund focused on broadband.

Consumers everywhere – both urban and rural – benefit. Reform will not only drive economic growth in rural America, but will expand the online marketplace nationwide, creating jobs and businesses opportunities across the country. — Federal Communications Commission

**WHY CHOOSE ALAMON?**

**QUALITY & ON-TIME DELIVERY**
For over 40 years, Alamon has consistently provided the highest levels of quality, service and workmanship. Through delivering customers’ projects on time and on budget, Alamon takes pride in building long-term relationships that span decades.

**VALUE FOR THE COST**
Alamon gets it right the first time, at a fair price. Our vast industry knowledge allows us to bid jobs accurately — we know what it takes to get your work done. Our customers don’t have to deal with change orders for inaccurately bid jobs.

**SERVICE PROTECTION**
The biggest names in telecommunications regularly entrust Alamon with their networks. We have the technicians, equipment and expertise to seamlessly integrate the latest technology into existing infrastructure.
