DATA COLLECTION SOFTWARE

# The Perfect Tool for NESC Violation Reporting

# NESC Violation Reporting Simplified.

Your inventory of the attachments on your utility poles is out of date. You need to accurately account for those attachments and know for sure whether you are compliant with current regulations. Under ordinary circumstances, this would be an overwhelming task. It isn't when you use Alatrac Pro.

## Focus on the work, not the software.

Alatrac streamlines the process of reporting NESC violations with an intuitive, field-friendly interface that keeps your focus on the work, not on figuring out the software.

### **CAPTURE**

Capture NESC violations using Alatrac's built-in library of nearly 300 predefined violation types.

### **VISUALIZE**

Take violation photos and use in-app drawing tools for additional illustration and comments.

### **REPORT**

Create reports with Alatrac's robust reporting capabilities, including NESC violation data filters.
